HOW TO MITIGATE TRANSPORTATION RISK

Mike and Jean Regan, Active Scout
The issue of Supply Chain Risk is garnering increased attention as manufacturing and distribution companies assess potential threats to their business.

Supply Chain risk encompasses different areas that can be complex and unpredictable. This presentation focuses on one area of the Supply Chain:

**Transportation Risk and the need to know about your carriers and their capabilities.**
Why is the risk associated with transportation a threat to your company:

Whether you know it or not, each one of your carriers creates the possibility of a supply chain disruption or worse, unwanted liability and damage to your reputation if they are involved in an accident, or fail to perform as promised.

Additionally, within the transportation industry, shippers are experiencing an increase in the number bankruptcies, theft and fraud, as well as litigation involving multi-million dollar settlements.

Specifically, shippers can be forced to pay the bill when one of their carriers gets into an accident or loses a shipment and has too little insurance to cover all the damages. It doesn’t matter that you didn’t cause the accident or create the loss. What matters is that your pockets are deeper than your carrier’s.
The average number of reported cargo theft incidents per day in 2012: 3.10

63% of US shippers and brokers have been held liable when parties to trucking accident lawsuits – based essentially on their choice of carrier.

The latest and largest judgment awarded against a shipper/broker for hiring a carrier with safety and maintenance violations: $58.5 million

58% of carriers carried only the standard $750k BIPD insurance minimum or less.
What is the risk?

- Costly litigation
- Identity Theft
- Fraud / Cargo Theft
- Irreparable damage to your brand
- Disruption in service:
  - From your suppliers, or
  - Shipments to your customers
    - In a “Lean” environment, the impact of disruptions is magnified.
The key to mitigating transportation risk to your company is simple:

You must know who you are doing business with and build forensic evidence which attests to the fact that you have done your due diligence in selecting your carriers.

You can do that by making (and documenting) smart, safe decisions.
Mitigating Transportation Risk

Steps for Success

1. Research
   Know who you are doing business with across all modes and regions, inbound and outbound to all of your locations

2. Analyze

3. Contract
   Collect key carrier information to include Authority, Safety, Insurance and Financial – data is very important, leave no stone unturned
   For details regarding recommended data, email theteam@shippershield.com

4. Source

5. Monitor

6. Manage
   Subscribe to automated alerts that provide information on current fraud and theft threats ie. TIA, Cargo Net

7. Record
Mitigating Transportation Risk

Steps for Success

1. Research
   Determine what requirements/levels to enforce with your carriers – it is important to involve stakeholders in these decisions

2. Analyze
   Evaluate the information you have to determine if the carrier you are using or vetting meets your requirements

3. Contract

4. Source

5. Monitor

6. Manage
   Collaborate with your carrier to determine if they *can* meet your requirements before making a decision

7. Record
Mitigating Transportation Risk

Steps for Success

1. Research
   
2. Analyze
   
3. **Contract**
   
4. Source
   
5. Monitor
   
6. Manage
   
7. Record

**Contract with ALL brokers and carriers that you source; do not rely on rate confirmations alone**

**In a good contract, critical party-related provisions are clearly stated, such as:**

- Service commitments
- Rates and payment terms
- Insurance requirements
- Indemnification
- Cargo loss and damage provisions
- Limitations of liability
- Claim filing time limitations
Mitigating Transportation Risk

Steps for Success

1. Research
   - Re-engineer your ‘Preferred Carrier Philosophy’ – source based on best service, optimal cost AND low risk

2. Analyze

3. Contract

4. Source
   - Select brokers that can prove due diligence in sourcing on your behalf and avoid co-brokerage arrangements

5. Monitor

6. Manage
   - Be prepared to deny the hiring of carrier or discontinue use if they don’t meet your requirements – no exceptions

7. Record
Mitigating Transportation Risk

Steps for Success

1. Research
   Review the critical details you collect on your carriers on an ongoing basis – this information can change at any time.

2. Analyze
   There are free resources available to you to manually collect this information – consider the number of carriers you utilize to determine overall time and $$$.

3. Contract

4. Source

5. Monitor
   An automated service will save you time and money and will be much more reliable – but they aren’t all the same, be sure to look at long term cost/value.

6. Manage

7. Record
Mitigating Transportation Risk

Steps for Success

1. Research
   Deploy a documented, centralized policy that addresses risk adverse sourcing and educate your staff from a corporate level to all locations.

2. Analyze
   Develop communication procedures that notify all when a carrier is no longer ‘OK’ to use – consider employing corrective action when staff is not compliant.

3. Contract

4. Source

5. Monitor

6. Manage
   When you make the decision to continue using a carrier that may present a risk, be sure schedule follow-up review.

7. Record
Mitigating Transportation Risk

Steps for Success

1. Research
   Remember – documentation is key, your process and record of activity is your forensic evidence

2. Analyze
   Ensure you are able to prove status of your carriers at the time of sourcing and at any time thereafter.

3. Contract

4. Source

5. Monitor
   Contact valued carriers that may be able to provide documentation to dispute report. Ask the important questions:
   *Is the issue real? Is the issue being addressed?*
   *Is there immediate corrective action that needs to be taken?*
Questions and Answers?

Thank you for your time!
