GE Transportation
Evolution® Series
Customer Outcomes

Asset Optimization…. \( \uparrow \) reliability, \( \uparrow \) availability, \( \uparrow \) utilization

- Make asset smarter, more self-aware, and more efficient
- Transition from “break-fix” to “predict & prevent” services

1% Asset Efficiency = $300MM

Operations Optimization … \( \uparrow \) efficiency, \( \uparrow \) visibility, \( \uparrow \) velocity

- Provide visibility into business processes and operations.
- Automate manual processes
- Enable instant, automated decision making
- Increase real-time data sharing across network

1 MPH of Network Velocity = $200MM
The Industrial Internet
